

# **Precast Cable Trough**

#### **Precast Cable Trough**

#### Use

Precast cable trough sections are recommended for installations where data cables require a subsurface chase for routing, installation and maintenance, typically along light rail or commuter rail lines. Removable composite top sections are available to fit with the precast cable troughs.

#### Sizes

Precast cable trough sections are normally available in 24 inch, 30 inch, and 36 inch widths and in 10 foot and 20 foot long sections. Transition units are available to connect cable trough sections of different widths.

#### **Application**

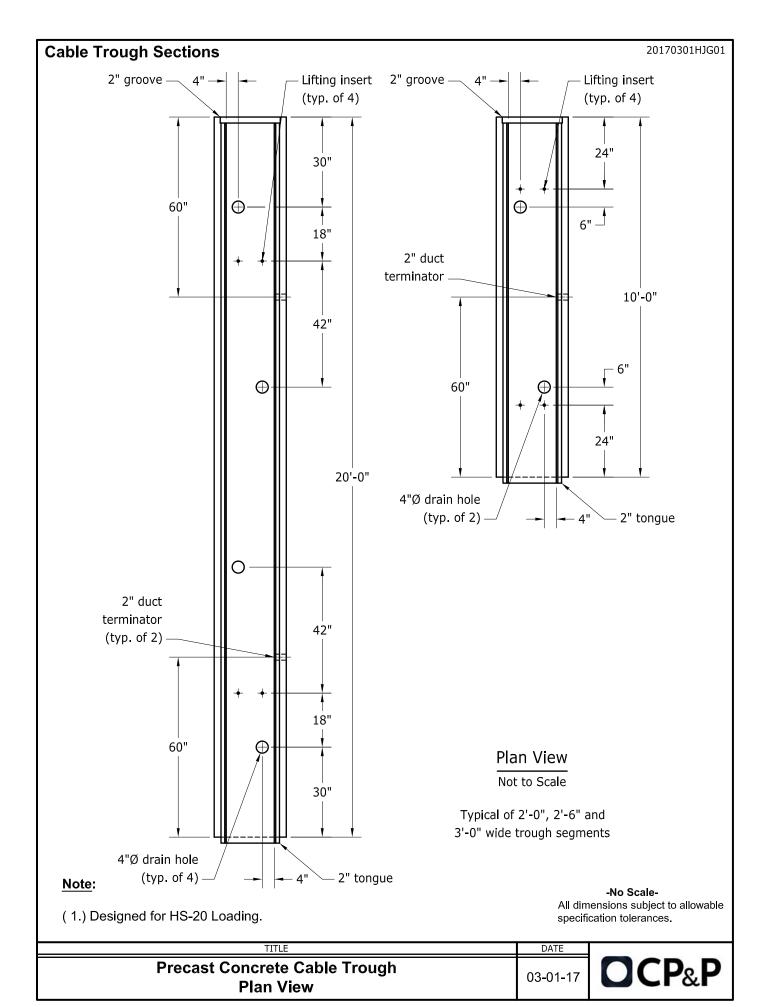

Precast cable trough sections can be used for the following:

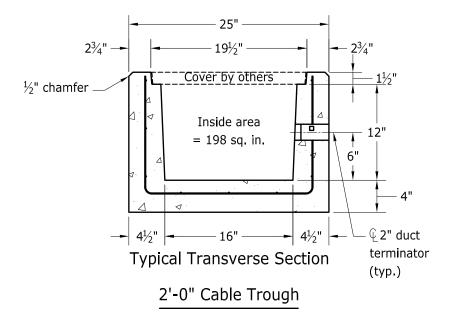

- light rail
- commuter rail
- subways
- data lines
- communications

#### **Joints**

Precast cable trough sections are produced with tongue and groove joints.

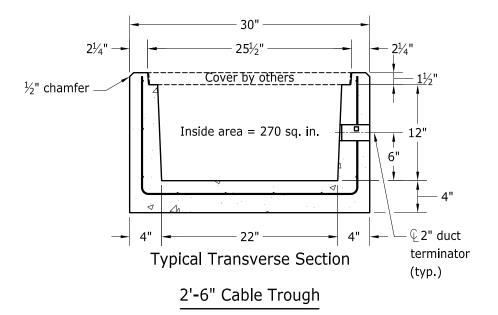

Approximate Weight = 220 lb per lin. ft
