

CONCRETE PIPE & PRECAST, LLC

CP&P supports critical Infrastructure

CP&P provides a wide array of products that are essential to our nation's wastewater and drainage infrastructure. Our footprint includes 12 manufacturing facilities in the Mid-Atlantic and Southeast regions, distribution partners, and local contractors. CP&P supplies products that are critical for our nation's transportation infrastructure and construction pipeline.

CP&P is committed to the ongoing safety and protection of their employees and is taking every precaution while maintaining operational continuity.

The Importance of Critical Infrastructure

During this time, it is important for businesses deemed "essential" and "critical infrastructure" to stay open and active in order to protect our nation's health and safety, as well as economic and national security. The Department of Homeland Security (DHS) and the Cybersecurity and Infrastructure Security Agency (CISA) have published "Guidance on the Essential Critical Infrastructure Workforce", which identifies and defines the critical infrastructure sectors.

These critical infrastructure sectors include "Transportation Systems" and "Wastewater Systems." The President noted that if you work in a critical infrastructure industry, as defined by the Department of Homeland Security, you have a special responsibility to maintain your normal work schedule. As a regional provider of products in the Transportation Systems and Wastewater Systems sectors, CP&P is committed to remaining open and supporting the White House directive.

Both transportation infrastructure and wastewater systems are necessary to the well-being of our nation. In times of a pandemic, as COVID-19 has been labeled by the World Health Organization, it becomes especially important to protect, maintain, and improve these systems. Due to the critical nature of its business, CP&P will continue to operate as necessary while placing the health and safety of its employees first by abiding by the precautionary measures recommended by local and national governments.

CP&P is a leading supplier of precast concrete solutions in the Mid-Atlantic and Southeast regions. The company specializes in the design and manufacturing of a complete line of concrete pipe and precast products for commercial and residential applications. Concrete precast structures include reinforced pipe, manhole components, box culverts, fittings and drainage structures. CP&P is committed to providing quality solutions for our customers' pipe and precast needs.
