Concrete Pipe & Precast Newsletter

Volume 45

## Concrete Pipe Week A Big Success!

Concrete Pipe Week 2022 was celebrated across the country in August. Almost every state that CP&P operates in published a State Proclamation celebrating and recognizing the contributions that Concrete Pipe products and the industry provides to our local communities, as well as providing a long lasting resilient infrastructure across the Nation.

CP&P celebrated locally with various plant tours for some of our local partners, and participated in an ACPA Webinar Broadcast of a Virtual Plant Tour of the Hanover Pipe Plant in Virginia. The virtual tour was viewed by almost 600 attendees across the globe.

CP&P would like to officially thank each and every business partner that helps to make concrete pipe the reliable product it is, and to each of the states and governors that officially recognized Concrete Pipe Week 2022.

Concrete pipe producers pose with SC Governor McMaster including Mike Young (Far Left) & Ryan Kistler (4th from Left)

## All In For Safety

CP&P's new **Platinum Safety Team** is identified and engaged. They are looking forward to visiting our plants to help make improvements, developing Best Practices and sharing information.

This team will travel to each plant for the purpose of observing and reviewing work practices and tasks, looking for safety improvements and developing best practices that can help make that plant safer, and provide additional safety feedback to other locations as well. The team will be looking for ways to help improve safety in a variety of ways such as work process improvements, energy control, machine guarding, environmental practices and anything else that will help improve the overall safety of the plant. These improvements will also serve as best practice items that, in turn, will be shared with all other CP&P locations. The team will study and determine corrective actions or best practices and work with plant manager and his team on implementation. An overall report will be generated and will be review with management (plant and senior)- and the team will follow up to ensure that identified items are completed.

Team will consist of 6 Primary with alternates. Alternates will serve to provide backup in case the primary cannot make the scheduled tour.

Main Team: Quincey Morris, Sean Haubert, Mark Jillson, Anthony Jackson, Tim Taylor, Billy Norris and William Armstrong.

Safety: Ed Eagle and Robert Strickland

Team will serve a minimum of 18 months and then will cycle out with new members as possible.

Quincey Morris

Sean Haubert

Mark Jillson

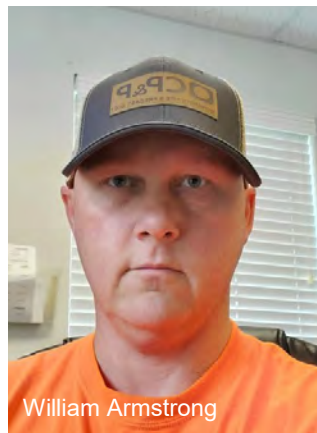

Anthony Jackson

Tim Taylor

Billy Norris

William Armstrong

Robert Strickland

# Casting Call

## Jennie Lam

Jennie Lam has joined our team in Harrisonburg as the Office Admin. She attended Liberty University and got her degree in Criminal Justice. Upon finishing her degree she did some work for a private security company and then joined the Page County Police force. Her babies are two Great Danes, Duke & Thor, and she enjoys bowling, martial arts and hiking with her husband, Andrew.

## Michelle Randozzo

Michelle Randozzo has joined our ClearFlow team as the Administrative Assistant in the Waynesboro office. She and husband, Frank, live in Greenville, VA and attend church in Staunton, VA. Their combined family of 3 sons, a daughter and 4 grandchildren make camping and beach trips fun! Welcome to Team ClearFlow!

## Anthony Urtarte

Anthony Urtarte arrived at Chesapeake Pipe on 15 July as Plant Superintendent. Anthony previously worked at a Block Plant in Florida as a Superintendent, producing block and pavement. In addition to his civilian profession, he served in the military for 22 years- 12 years US Navy and 10 years in the US Army. Anthony has served in campaign(s) Operation Enduring Freedom, Operation Iraq Freedom, Operation Ocean Shield, and Operation Inherent Resolve.

Anthony is married to Diamond and they have four boys and are expecting another in December. He relishes spending time with his family and loves to run with the goal of completing a full marathon!

Look at that beautiful CP&P Precast!

## DoorDash Incident – August 2022

### What Happened?

DoorDash, a popular food delivery app, detected suspicious activity from the computer network of a third-party vendor, and determined the vendor was compromised by a sophisticated phishing attack. Certain personal information maintained by DoorDash like names, emails, addresses, phone numbers, and partial payment card info have been affected. If exploited, cybercriminals can create profiles to target victims with spam or phishing attempts.

### What should you do?

Never click any links or attachments in suspicious emails. ...  
If the suspicious message appears to come from a person you know, contact that person via some other means such as text message or phone call to confirm it.  
Report the message (see below).  
Delete it.

### What is phishing?

#### Definition(s):

 A technique for attempting to acquire sensitive data, such as bank account numbers, through a fraudulent solicitation in email or on a web site, in which the perpetrator masquerades as a legitimate business or reputable person.

Phishing is when attackers send malicious emails designed to trick people into falling for a scam. The intent is often to get users to reveal financial information, system credentials or other sensitive data.

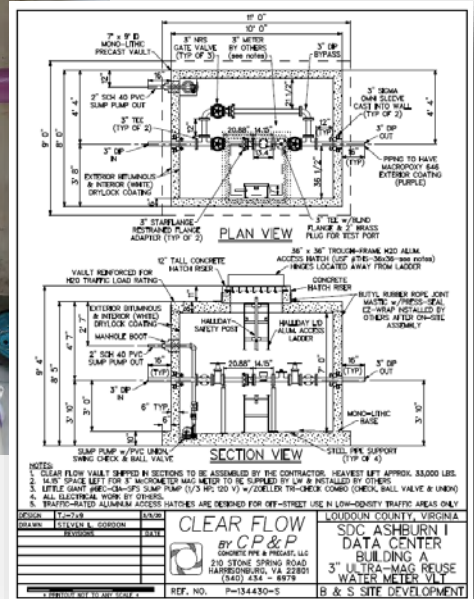

Phishing is an example of [social engineering](#): a collection of techniques that scam artists use to manipulate human psychology. Social engineering techniques include forgery, misdirection and lying—all of which can play a part in phishing attacks. On a basic level, phishing emails use social engineering to encourage users to act without thinking things through.

Chesapeake Pipe team receives some top quality training from Cintas on First Aid/ CPR and AED.

Trainer was Andrea Ishee.

## Project Spotlight

# CLEARFLOW

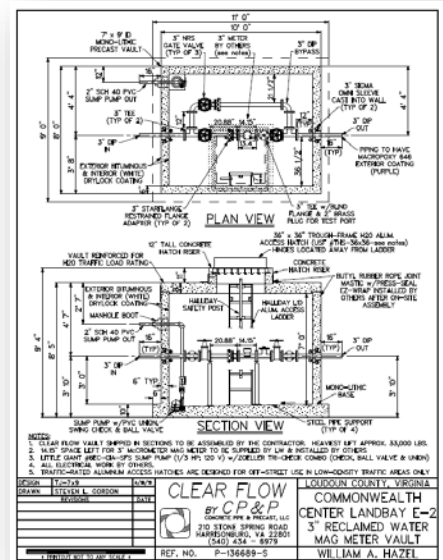

## Reclaimed meter vault - Loudoun County, VA

Reclaimed water is safe for non-potable uses such as industrial cooling and irrigation. Reclaimed water is continuously monitored and tested to ensure that its quality meets Level 1 standards, the highest level quality designation. For new construction or retrofitting, approved construction plans and valid permits are needed to connect to the reclaimed water system. Loudoun Water engineers are available to guide customers through the connection process and to provide additional information on special requirements, including signage, labeling, and backflow prevention.

Reclaimed water may also be used for a variety of construction purposes such as truck wash, dust control and concrete mixing.

### Reclaimed Water System

In 2010 Loudoun Water constructed the first pipelines of the reclaimed water distribution system to supply irrigation and industrial cooling water to Loudoun County's rapidly growing data center industry. The reclaimed water distribution system has since expanded to 20 miles of pipeline and serves more than 40 facilities. In 2021, Loudoun Water delivered 675 million gallons of reclaimed water to its customers, helping to save an equal amount of precious potable drinking water while reducing nutrients discharged to the Potomac River and Chesapeake Bay

## ***Anthony Jackson appointed by the NPCA to the Underground Products & Infrastructure Committee***

It is with pride that we share that Anthony Jackson, Quality Control, Dunn Precast, has been appointed by the NPCA to the Underground Products & Infrastructure Committee for the 2022- 2023 term. That committee exists to support NPCA members involved in manufacturing Manholes, Pipe, Box Culvert, 3-Sided Small Bridges & Wing Walls, Long Span 4-Side Box Structures [ > 12' span, outside of scope of C1577, C1433], Utility Structures, Inlets & Catch Basins, and Stormwater Detention and Treatment structures. Anthony's experience at Dunn, and his Master Precaster status, positions him well to make a difference on this committee.

### ***CP&P—On The Road...***

Do you know where this photo of our CP&P swag was taken?

Answer in next month's newsletter.

Last month's location: Anna Maria Island

## ***Jessup Pipe provides hand's on training***

Anthony Gentile (Jessup Pipe) training Delroy Johnson on how to lay out and scar a fresh section of 48" Concrete Pipe to produce a 45 Degree Precast Bend Section. This is the first step in producing a precast fitting or bend.

Delroy has made several fittings, but this was the first one that he laid out from the start.

Good stuff and Anthony was a good trainer.

### **Concrete Pipe & Precast Commitment**

We are committed to making Concrete Pipe & Precast the preferred supplier for our customers by delivering outstanding value, continuous innovation, and exceptional customer experience by consistently fulfilling our promise:

***"Not Just Concrete, Concrete Solutions."***

## ***Oakboro Plant Tour during Concrete Pipe Week 2022***

A big Thank You! from CP&P to the cities of Concord, Kannapolis and Albemarle for attending our Oakboro pipe plant tour! Great group as we roll into National Concrete Pipe Week. Martin and John explain the dry cast process, Martin shows group how wire reinforcement cages are made on the K&N machine, Joe demonstrates the proper installation of a profile gasket and Tim sets up the 3 edge bearing test.

Congratulations!
